

Junior Data Engineer at a Microsoft Data & AI consultancy, building Fabric lakehouse solutions and Power BI reporting for client projects. Background in technical mathematics; works agentic-first with Claude Code and has shipped a deployed multi-user application on Fabric.

## — EXPERIENCE

- **Junior Data Engineer** Aug 2026 – present  
HackRabbits GmbH — Microsoft Data & AI consultancy, Vienna
  - Deliver Microsoft Fabric data solutions for consulting clients — Lakehouse and medallion architecture, Data Factory pipelines, Power BI reporting — working agentic-first with Claude Code as the primary development method
  - Build semantic models and DAX measures; automate ingestion and reporting workflows end-to-end with Python, SQL and PySpark
  - Support client workshops, requirements elicitation and user training under senior coaching, growing toward independently run engagements
- **Publikumsdienst** Nov 2025 – present  
Wiener Stadthalle, Vienna
  - Access control, seating guidance and visitor information at large-scale events, alongside studies and work
- **Jr. Data Analyst Intern** Sep 2024 – Mar 2025  
HackRabbits GmbH, Vienna
  - Built Power BI dashboards for financial reporting and time tracking, integrating multiple source systems
  - Prepared and modelled data from heterogeneous sources into a standardised, reusable data model
- **Paramedic, Freiwilliges Sozialjahr** Jul 2022 – Apr 2023  
Austrian Red Cross, Brunn am Gebirge
  - Emergency response and patient care on ambulance shifts throughout a full voluntary social year

## — SELECTED PROJECTS

**Work Hour Tracker** 2026  
a multi-user time-tracking and project-planning app on Microsoft Fabric: React 19 + TypeScript SPA, Entra ID sign-in, MSSQL backend defined declaratively with Rayfin, with authorization enforced twice (API policies + SQL row-level security) from a single source of truth.

**Power BI Financial Dashboard (Income and Expenditure Tracker)** 2024–25  
HackRabbits. Income and expenditure model integrating multiple bank accounts, with dynamic visualisations for financial monitoring.

## — EDUCATION

- BSc Psychology (in progress) — University of Vienna** Oct 2025 – present
- Technical Mathematics — TU Wien** Oct 2023 – Feb 2025  
Coursework: Linear Algebra, Analysis, Computational Mathematics, Programming
- International Baccalaureate Diploma — International High School Herzogberg** 2022  
HL: Mathematics, Chemistry, Biology

## TECHNICAL SKILLS

**Data & analytics**  
Microsoft Fabric (Lakehouse, Data Factory, notebooks, medallion architecture), Power BI (semantic models, DAX, Power Query), Azure SQL

**Programming**  
Python (PySpark), SQL / T-SQL, TypeScript & React, C / C++, LaTeX

**Cloud & tooling**  
Entra ID, Azure CLI, Rayfin, Git / GitHub, VS Code, Jupyter

**Ways of working**  
agentic development with Claude Code, requirements elicitation
